SYSTEMS & CONTROL LETTERS

Author Index Volume 35 (1998)

(The issue number is given in front of page numbers)

Atar, R. and **O. Zeitouni,** A note on the memory length of optimal nonlinear filters (2) 131–135

Barabanov, N.E., On the static H_∞ control problem (1) 13–18
Barmish, B.R., see C.M. Lagoa (1) 31–43
Basto-Gonçalves, J., Second-order conditions for local controllability (5) 287–290
Blanchini, F. and **S. Miani,** Constrained stabilization via smooth Lyapunov functions (3) 155–163
Blondel, V., see B. De Schutter (2) 69–78

Cannon, M. and **B. Kouvaritakis,** Fast suboptimal predictive control with guaranteed stability (1) 19–29
Cao, Y.-Y., Y.-X. Sun and **W.-J. Mao,** Output feedback decentralized stabilization: ILMI approach (3) 183–194
Chen, B.M., Direct computation of infimum in discrete-time H_∞-optimization using measurement feedback (5) 269–278
Chen, H.-F. and **K. Uosaki,** Convergence analysis of dynamic stochastic approximation (5) 309–315
Chen, X. and **T. Fukuda,** Robust adaptive quasi-sliding mode controller for discrete-time systems (3) 165–173
Chen, X. and **K. Zhou,** Order statistics and probabilistic robust control (3) 175–182

De Moor, B., see B. De Schutter (2) 69–78
De Schutter, B., V. Blondel, R. De Vries and **B. De Moor,** On the boolean minimal realization problem in the max-plus algebra (2) 69–78
De Vries, R., see B. De Schutter (2) 69–78
Dontchev, A.L. and **W.W. Hager,** A new approach to Lipschitz continuity in state constrained optimal control (3) 137–143
Doroftei, M. and **D. Lambadarie,** A stabilization problem with respect to a target set for affine uncontrollable systems (4) 257–267

Fröhler, S. and **U. Oberst,** Continuous time-varying linear systems (2) 97–110
Fukuda, T., see X. Chen (3) 165–173

Garcia-Planas, Ma.I. and **M.D. Magret,** Miniversal deformations of linear systems under the full group action (5) 279–286
Grigoriadis, K.M., see J.T. Watson (2) 111–118
Guo, L., see L.L. Xie (3) 201–206
Gyurkovics, É., Receding horizon control via Bolza-type optimization (3) 195–200

Hager, W.W., see A.L. Dontchev (3) 137–143

Koole, G., A transformation method for stochastic control problems with partial observations (5) 301–308
Koroleva, N., see X. Mao (5) 325–336
Kouvaritakis, B., see M. Cannon (1) 19–29

Lagoa, C.M., P.S. Shcherbakov and **B.R. Barmish,** Probabilistic enhancement of classical robustness margins: The unirectangularity concept (1) 31–43
Lam, H.K., see F.H.F. Leung (4) 237–243
Lambadarie, D., see M. Doroftei (4) 257–267
Leung, F.H.F., H.K. Lam and **P.K.S. Tam,** Design of fuzzy controllers for uncertain nonlinear systems using stability and robustness analyses (4) 237–243
Luo, J. and **P. Tsiotras,** Exponentially convergent control laws for nonholonomic systems in power form (2) 87–95

Magret, M.D., see Ma.I. Garcia-Planas (5) 279–286
Mao, W.-J., see Y.-Y. Cao (3) 183–194
Mao, X., N. Koroleva and **A. Rodkina,** Robust stability of uncertain stochastic differential delay equations (5) 325–336
Mazenc, F., Interconnected nonlinear systems, local and global stabilization (5) 317–323
Miani, S., see F. Blanchini (3) 155–163
Miller, D.E., On the order of nonlinear time-invariant stabilizing controllers (2) 119–129

Nešić, D., A note on observability tests for general polynomial and simple Wiener–Hammerstein systems (4) 219–227

Elsevier Science B.V.

Nešić, D. and **E.D. Sontag,** Input-to-state stabilisation of linear systems with positive outputs (4) 245–255

Ober, R.J., Asymptotic stabilization of infinite-dimensional systems which cannot be exponentially stabilized (1) 61–63
Oberst, U., see S. Fröhler (2) 97–110

Pait, F.M., A tuner that accelerates parameters (1) 65–68
Pappas, G.J. and **S. Sastry,** Straightening out rectangular differential inclusions (2) 79–85
Pati, B.B., see K.C. Patra (4) 229–236
Patra, K.C. and **B.B. Pati,** An investigation of forced oscillation for signal stabilisation of two-dimensional nonlinear system (4) 229–236

Rodkina, A., see X. Mao (5) 325–336

Sastry, S., see G.J. Pappas (2) 79–85
Sastry, S.S., see C.J. Tomlin (3) 145–154
Savkin, A.V., Regularizability of complex switched server queueing networks modelled as hybrid dynamical systems (5) 291–299
Shamma, J.S. and **K.-Y. Tu,** Output feedback control for systems with constraints and saturations: scalar control case (1) 1–11
Shcherbakov, P.S., see C.M. Lagoa (1) 31–43
Sontag, E.D., see D. Nešić (4) 245–255
Stoorvogel, A.A. and **J.H. van Schuppen,** Approximation problems with the divergence criterion for Gaussian variables and Gaussian processes (4) 207–218
Sun, Y.-X., see Y.-Y. Cao (3) 183–194

Tam, P.K.S., see F.H.F. Leung (4) 237–243
Tomlin, C.J. and **S.S. Sastry,** Switching through singularities (3) 145–154
Tsiotras, P., see J. Luo (2) 87–95
Tu, K.-Y., see J.S. Shamma (1) 1–11

Uosaki, K., see H.-F. Chen (5) 309–315

van Schuppen, J.H., see A.A. Stoorvogel (4) 207–218

Watson, J.T., Jr and **K.M. Grigoriadis,** Optimal unbiased filtering via linear matrix inequalities (2) 111–118
Wu, Q.-H., Computation of the stability radius of a Hurwitz polynomial with diamond-like uncertainties (1) 45–60

Xie, L.L. and **L. Guo,** Adaptive control of a class of discrete-time affine nonlinear systems (3) 201–206

Zeitouni, O., see R. Atar (2) 131–135
Zhou, K., see X. Chen (3) 175–182
